Sail & Canvas

San Luis Obispo, CA, USA

Industrial Textile Capabilities

Process

We are committed to providing our customers total satisfaction. Every time. Guaranteed.

Our loft in San Luis Obispo, CA is over 4,500 square feet with six in-floor sewing machines. This allows for large projects to be set up efficiently. We put an emphasis on precision during our textile manufacturing processes. Projects begin with detailed analysis, are then translated into digital models, realized by our CNC textile plotter-cutter and assembled by our experienced staff. SLO Sail and Canvas is a versatile industrial sewing shop providing quality custom work to suit your needs. We have completed projects large and small, from custom semi truck trailer covers to small wine fermentation bin screens.

What We Make

■ Covers

Protect your equipment from UV, water and/or wind damage with a custom cover. Any size, shape and material, we can make it.

■ Nets and Trampolines

We have the capability to make cargo nets of all sizes for all purposes. We stock strong, high quality mesh for trampoline projects too.

■ Shade and Privacy Screens

Improve your exterior spaces with a striking shade-sail or colorful privacy screen. Made to fit in your choice of color.
